## P R O F I L E

Passionate full-stack developer with a year of experience building quality websites across various domains. Proficient in new frameworks like Next.js and Nest.js, MERN stack and skilled at creating responsive, attractive, and modern user interfaces using Tailwind CSS. Looking to leverage my technical skills and creativity to contribute to innovative web development projects.

## W O R K   E X P E R I E N C E

### ■ Aug 2025 - PRESENT

INFNOVA Technologies, Addis Ababa, Ethiopia

#### **Backend Developer**

- Developing server-side LMS application using Nest.js, Prisma with MySQL DB
- Building and maintaining RESTfull APIs, database schemas and backend architecture.
- Collaborating with frontend and UI/UX team to integrate APIs and support full-stack feature.
- Implementing authentication, data validation and secure request handling for production level system.

### ■ Jul 2025 - Sep 2025

Kuraz Tech, Addis Ababa, Ethiopia

#### **Front End Developer**

- Built responsive front-end components using React and Tailwind, improving UI consistency across the application.
- Developed a financial tracker tool using the MERN stack, enabling users to visualize and manage transactions.
- Collaborated in Agile sprints and used Git for version control to support a multi-developer workflow.

## E D U C A T I O N
